

Commissioners of Barnesville

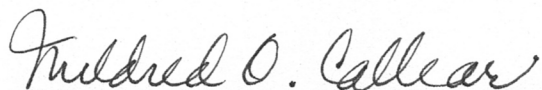

Resolution 2020-1

Pursuant to the Charter of the Town of Barnesville, it is hereby

RESOLVED, that the Town of Barnesville Building Permit application forms shall contain a fee schedule for approval of permits, to be revised by the Commissioners from time to time, as well as a provision notifying applicants that the Town will make a determination as to whether the Town will need to incur engineering, planning, legal and other costs in reviewing the application for approval of the Permit and as well as during the course of construction;

FURTHER RESOLVED, that if the Commissioners determine, in their full discretion, that such costs are not de minimus and should be borne by the applicant rather than the Town, such costs may be passed along to the applicant and the Town shall charge and collect the same from the applicant. If exact amounts are not able to be determined at the time of permit approval, the Town may request a deposit or other form of bond and will deduct costs as incurred and reimburse applicant at final conclusion of the project to the extent that such costs are lower than the amount previously charged and collected. Likewise, if additional costs beyond those originally anticipated must be incurred by the Town, the Town has the authority to charge and collect fees to cover them.

Approved by the Commissioners of Barnesville on January 6, 2020
